

## **AMENDMENTS TO THE CLAIMS**

The following listing of claims will replace all prior versions and listings of claims in the application:

### **Listing of Claims:**

1. (Currently Amended) A mobile phone, the mobile phone including an upper phone member with a display and a lower phone member, the mobile phone comprising:

an ~~alphanumeric~~alphabetical keypad including a plurality of alphabetical input keys corresponding to alphabet letters A-Z, the ~~alphanumeric~~alphabetical keypad including a left set of one or more rows of ~~alphanumeric~~alphabetical input keys and a right set of one or more rows of ~~alphanumeric~~alphabetical input keys separated by a centerline, the left set of one or more rows of ~~alphanumeric~~alphabetical input keys including a top row with a right-most key, the right set of one or more rows of ~~alphanumeric~~alphabetical input keys including a top row with a left-most key, and the right-most key of the top row of the left set of one or more rows of ~~alphanumeric~~alphabetical input keys being immediately adjacent to the left-most key of the top row of the right set of one or more rows of ~~alphanumeric~~alphabetical input keys, the left set of one or more rows of ~~alphanumeric~~alphabetical input keys arranged in one or more respective arcs having one or more respective arc centers located to the left of the centerline, and the right set of one or more rows of ~~alphanumeric~~alphabetical input keys arranged in one or more respective arcs having one or more respective arc centers located to the right of the centerline; and

a numeric-keypad including a plurality of ~~phone~~ number input keys corresponding to numbers 0-9, ~~that together~~all the number input keys are arranged together to form in

a rectangular configuration ~~for entering phone numbers~~ and distinct from the left and right sets of one or more rows of alphanumeric alphabetical input keys,

wherein the left set of one or more rows of alphanumeric alphabetical input keys and the right set of one or more rows of alphanumeric alphabetical input keys are sandwiched between the display and the numeric keypad, and the alphabetical keypad, the display, and the numeric keypad are vertically aligned and include a common centerline through the mobile phone.

2. (Currently Amended) The keyboard mobile phone of claim 1, wherein the keyboard alphabetical keypad has a QWERTY keyboard layout, and the left set of one or more rows of alphabetical input keys include a top row with alphabetical input keys corresponding to letters Q, W, E, R, T, Y.

3. (Withdrawn) The keyboard of claim 1, wherein the keyboard has a DVORAK keyboard layout.

4. (Currently Amended) The keyboard mobile phone of claim 1, wherein the one or more respective arc centers of the left set of one or more rows of input keys are concentric and the one or more respective arc centers of the right set of one or more rows of input keys are concentric.

5. (Currently Amended) The keyboard mobile phone of claim 1, wherein the one or more respective arc centers of the left set of one or more rows of input keys are collinear and the one or more respective arc centers of the right set of one or more rows of input keys are collinear.

6. (Currently Amended) The keyboard mobile phone of claim 1, wherein the one or more respective arc centers of the left set of one or more rows of input keys are collinear and located in at least one of a vertical line and a horizontal line and the one or

more respective arc centers of the right set of one or more rows of input keys are collinear and located in at least one of a vertical line and a horizontal line.

7. (Currently Amended) The keyboardsmobile phone of claim 1, wherein the one or more respective arcs of the left set of one or more rows of alphabetical input keys and the one or more respective arcs of the right set of one or more rows of alphabetical input keys ~~respective arcs of the left set of one or more rows of input keys and the respective arcs of the right set of one or more rows of input keys~~ include radii of curvature between 10 mm and infinity.

8. (Currently Amended) The keyboardsmobile phone of claim 1, wherein the one or more respective arcs of the left set of one or more rows of alphabetical input keys and the one or more respective arcs of the right set of one or more rows of alphabetical input keys ~~arcs of the left set of one or more rows of input keys and the arcs of the right set of one or more rows of input keys~~ form respective angles between 0 and 90 degrees with respect to the centerline.

9. (Cancelled)

10. (Currently Amended) A mobile phone, the mobile phone including an upper phone member with a display, a lower phone member, the mobile phone comprising:

an alphanumericalphabetical keypad including a plurality of alphabetical input keys corresponding to alphabet letters A-Z, the alphanumericalphabetical keypad including a left set of one or more rows of alphanumericalphabetical input keys including a left-most alphanumericalphabetical input key and a right most alphanumericalphabetical input key and a right set of one or more rows of alphanumericalphabetical input keys including a left-most alphanumericalphabetical input key and a right most alphanumericalphabetical input key separated by a

centerline, the left set of one or more rows are opposite the right set of one or more rows, and lines drawn through the left-most ~~alphanumeric~~alphabetical input key and the right most ~~alphanumeric~~alphabetical input key of the left set of one or more rows of alphabetical input keys and through the right-most alphabetical input key and the left most alphabetical input key of the right set of one or more rows of alphabetical input keys of opposite rows intersect the centerline, immediately adjacent the right-most ~~alphanumeric~~alphabetical input key of the left set of one or more rows of ~~alphanumeric~~alphabetical input keys and the left-most ~~alphanumeric~~alphabetical input key of the right set of one or more rows of ~~alphanumeric~~alphabetical input keys, to form a V shape with a vertex intersecting the centerline; and

a numeric keypad including a plurality of ~~phone~~ number input keys corresponding to numbers 0-9, that together all the number input keys are arranged together to form in a rectangular configuration ~~for entering phone numbers~~[[,]] and distinct from[[,]] the left and right sets of one or more rows of ~~alphanumeric~~alphabetical input keys,

wherein the left set of one or more rows of ~~alphanumeric~~alphabetical input keys and the right set of one or more rows of ~~alphanumeric~~alphabetical input keys are sandwiched between the display and the numeric keypad, and the open end of the V shape directed towards the display and the vertex directed towards the numeric keypad and the alphabetical keypad, the display, and the numeric keypad are vertically aligned and include a common centerline through the mobile phone.

11. (Currently Amended) The ~~keyboard~~mobile phone of claim 10, wherein the ~~keyboard~~alphabetical keypad has a QWERTY keyboard layout, and the left set of one or more rows of alphabetical input keys include a top row with alphabetical input keys corresponding to letters Q, W, E, R, T, Y.

12. (Withdrawn) The keyboard of claim 10, wherein the keyboard has a DVORAK keyboard layout.

13. (Currently Amended) The ~~keyboard~~mobile phone of claim 10, wherein the lines drawn through the left-most alphabetical input key and the right most alphabetical input key of the left set of one or more rows of alphabetical input keys and through the right-most alphabetical input key and the left most alphabetical input key of the right set of one or more rows of alphabetical input keys~~left-most input key and the right-most input key of each row~~ intersect at the centerline to form an angle with respect to the centerline that is between 0 degrees and 90 degrees.

14. (Currently Amended) The ~~keyboard~~mobile phone of claim 10, wherein the left set of one or more rows of input keys are arranged in one or more respective arcs having one or more respective arc centers located to the left of the centerline, and the right set of one or more rows of input keys are arranged in one or more respective arcs having one or more respective arc centers located to the right of the centerline.

15. (Currently Amended) The ~~keyboard~~mobile phone of claim 14, wherein the one or more respective arcs of the left set of one or more rows of alphabetical input keys and the one or more respective arcs of the right set of one or more rows of alphabetical input keys~~respective arcs of the left set of one or more rows of input keys and the respective arcs of the right set of one or more rows of input keys~~ include radii of curvature between 10 mm and infinity.

16 – 20 (CANCELLED)
